

Karthik Salupala

AI Engineer · Full Stack Developer · Data Science

Hyderabad, India | +91-7702398745 | karthiksalupala@gmail.com | github.com/karthiksalupala-ds | linkedin.com/in/karthik-salupala-0a9829326

Professional Summary

Results-driven AI Engineer and Full Stack Developer with proven experience shipping production-grade applications that integrate large language models, REST APIs, and modern React architectures. Delivered multiple end-to-end AI-powered products spanning travel intelligence and conversational agents, demonstrating the ability to translate complex AI capabilities into intuitive user experiences. Recognized for rapid execution, clean system design, and performance under pressure in competitive hackathon environments. Actively pursuing roles at the intersection of generative AI and scalable web development.

Technical Skills

Languages	Python, Java
Frontend	React.js, HTML5, CSS3, Context API, Responsive Design
AI / LLM	OpenAI API, Generative AI, Prompt Engineering, LLM Integration, AI Chatbot Development
Backend / DB	REST APIs, Supabase (PostgreSQL), Authentication & Authorization
DevOps / Tools	Git, GitHub, Vercel, CI/CD Deployment
CS Fundamentals	Data Structures & Algorithms, Object-Oriented Programming, State Management

Projects

Planzo.ai 2026

React.js · OpenAI API · Supabase · Vercel · Python

Architected and launched a full-stack AI travel planning platform that generates personalized multi-day itineraries from natural-language user inputs, reducing trip planning time by an estimated 70%. Orchestrated OpenAI API prompts with structured output parsing to deliver context-aware destination recommendations, activity scheduling, and budget breakdowns across diverse user profiles. Engineered secure JWT-based authentication and a normalized PostgreSQL schema via Supabase, supporting real-time data sync and zero-downtime session management. Deployed production build to Vercel with CI/CD pipeline, achieving sub-second load times through code splitting and optimized API call batching.

Context API Agent 2025

React.js · Context API · LLM Integration · REST APIs

Designed and shipped a multi-turn AI chatbot system with stateful conversation management, enabling context retention across 10+ message exchanges without performance degradation. Implemented global state architecture using React Context API, eliminating prop-drilling across 8+ components and cutting re-render overhead by approximately 40%. Delivered a real-time streaming response interface with typing indicators and optimistic UI updates, improving perceived responsiveness and user engagement metrics.

Quantum Hackers 2026

Full Stack · Rapid Prototyping · Team Collaboration

Led front-end development in a competitive hackathon, collaborating with a 3-person team to deliver a fully functional application within a 24-hour constraint. Prioritized and shipped core product features under deadline pressure, receiving recognition for technical execution and live demo quality from judges.

Education

AVN Institute of Engineering and Technology — Bachelor of Technology (B.Tech), Data Science 2024 – 2028

Vidwan junior college — Intermediate, MPC Stream 2022 – 2024

TS Model school — Certificate (SSC/Class X) 2022

Certifications

- Artificial Intelligence Fundamentals — IBM SkillsBuild (Sep 2025)
- Generative AI for Beginners — Simplilearn SkillUp (Sep 2025)
- Introduction to Generative AI Studio — Google Cloud / Simplilearn (Sep 2025)
- Customer Engagement: Problem Solving & Process Controls — IBM SkillsBuild (Sep 2025)
- Customer Engagement: Communication & Personality Dynamics — IBM SkillsBuild (Sep 2025)
- Object-Oriented Programming in Java — Certified (Mar 2026)
- Java Programming for Beginners — Certified (Mar 2026)
